SYMPOSIUM & EXHIBITION

BARCELONA  
17th-20th November 2013

eurelectric  
— ELECTRICITY FOR EUROPE

- Objectives
  - Delivering Carbon Neutral Electricity in Europe by 2050
  - Ensuring a cost-efficient reliable supply through an integrated market
  - Developing energy efficiency and the electrification of the demand-side to mitigate climate change

Organized by

Hosted by

AVERE

MEVA

EVAAP EDTA

Supported by

European  
Commission

- Can the Electricity System cope with the electrification of Road Transport?
- Is there a saving in CO<sub>2</sub> emissions or merely a transfer from the tailpipe to the power station?
- Are there other benefits for the electricity system?

Supported by

- The European Electricity System is ready NOW to power electric vehicles
- CO<sub>2</sub> reductions will happen immediately and increase as the grid decarbonises
- Longer term issues will be managed and benefits will accrue at National Grid Level
- Shorter term issues at distribution level
- All issues easily managed by Smart Charging
